Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Arendt.

Arendt discloses a powder of unhulled cereal grains. The powder is obtained by tempering whole grain wheat in water, roasting the tempered wheat and milling the roasted wheat into a fine brown-colored powder. (see column 2 lines 45-55)

Arendt discloses using whole grains; thus, no component is removed from the grains. This is the same as the claimed unhulled grains. The powder has a brown color; thus, the wheat inherently is roasted to a brown color.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arendt.

Art Unit: 1761

The teaching of Arendt is described above. Arendt does not disclose roasting till the grains are black.

Document number 2-308783 on the IDS was not considered because there is no English abstract or discussion of relevance.

It would have been obvious to one skilled in the art to roast the grains to varying degree of darkness depending upon the color desired for the product.
